

Fire Under The Stars

Environmental songs, stories and humour with Eric Maddern

*We became human sitting round a fire under the stars
We are now burning up the planet.
We are a miracle in the Universe yet we are undermining our
survival and the survival of the
Garden of Eden that is our lovely, lonely, living Planet Earth*

*This show is a bold, inspiring, hopeful and
heart-warming take on the big picture and
the step up we must make.
Eric Maddern is an Australian born storyteller,
singer-songwriter and author.*
